

Bracelet Size Guide

Use a tape measure to find your bracelet size

Please use a flexible tape measure handy or print out the bracelet size chart.

Make sure the "Scale to Fit" option is set to "None".

You can use a ruler to measure on the scale to check if the printout is correct.

How to find your bracelet size

1. Please wrap the tape measure around your wrist just below the wristbone.

Note the measurement length in cm.

2. The number in cm would be your wrist size.

You can add 0.5cm for a regular fit, or 1.0cm for a loose fit.

3. The added number would be the Nova bracelet size to order.

4. If you are not sure what fit you would like, We recommend choosing the medium fit.
